

TWO

Exhibits & Displays, Inc.

WHERE VISION BECOMES REALITY

5147 W. Clifton St Tampa Fl 33634 813 887 1960

On a Mac

You must use an FTP client. Nothing else works reliably.

If you don't have an FTP client (Fetch or Transit), download the free Cyberduck client <http://cyberduck.ch/> and drag the duck into your applications folder

Open your FTP client (Cyberduck) and put `ftp://admtwo.dyndns.org` in the address line

On Cyberduck (and maybe others) you will need to uncheck "Anonymous login"

Username is *firstnameadm* and password is `admtwo.2`

This should open a window that you can drag files into and out of.

On a PC

Open any window (like My Documents) and put `ftp://admtwo.dyndns.org` into the address line

Username is *firstnameadm* (see below) and password is `admtwo.2`

This should open a window that you can drag files into and out of

Download artwork guidelines for basic artwork info.

Always contact your rep for specific details.
